PROFESSIONAL SUMMARY

I'm a Software Architect with experience designing and building secure, large-scale enterprise applications, DevOps pipelines, and cloud-based architectures. I focus on identity-driven security, secrets management, and network isolation using Azure services like Entra ID, Key Vault, and virtual networks.

Key Technologies: .NET Core, Typescript, Azure Cloud, Azure DevOps

EXPERIENCE

.NET Developer (Angular JS)

Los Angeles Unified School District – Los Angeles, CA | March 2024 - Present

- Spearhead development of critical enterprise applications for executive stakeholders and the public.
- Architect and maintain web applications using AngularJS and .NET Core 8, secured with MSAL and Entra ID.
- Develop Power BI dashboards for budget, staff, and student data analytics.
- Manage CI/CD pipelines and deployments across Dev, Test, and Production environments in Azure.
- Administer Azure services including Web Apps, API Management, Firewalls, App Registrations, Key Vaults.
- Ensured secure application architecture by integrating Azure Key Vault for secrets management, Web Application Firewall (WAF) for traffic protection, Virtual Networks for resource isolation, and Microsoft Entra ID for authentication and access control.

Programmer Analyst 2

Kinecta Federal Credit Union – Manhattan Beach, CA | May 2023 - October 2023

- Led ReactJS development for member-facing applications hosted in AWS Docker containers.
- Migrated legacy ASMX services to modern C# .NET RESTful APIs.
- Integrated fintech solutions including Zelle, Origence, and Fusion IQ.
- Automated deployments and managed infrastructure in Azure.

Programmer Analyst 1

Kinecta Federal Credit Union – Manhattan Beach, CA | May 2020 - May 2023

- Maintained and enhanced customer-facing platforms in ReactJS and C# .NET
- Supported production issues across UI, APIs, and legacy services.
- Contributed to the planning and execution of major integration projects.

Web Developer - Part time

Kinecta Federal Credit Union – Manhattan Beach, CA | December 2019 - May 2020

- Designed UI mockups in ReactJS/OnsenUI for new online banking services.
- Built and tested service connections using Java Spring Boot.

Web Developer Intern

Kinecta Federal Credit Union – Manhattan Beach, CA | May 2019 - December 2019

- Assisted in early-stage design and prototyping for mobile banking services.
- Contributed to integration testing between internal and vendor systems.

IT Intern Help Desk Engineer

NKSFB – Westwood, CA | April 2018 - May 2019

- Maintained intranet content and developed automation scripts (Python, AutoHotKey).
- Provided Tier 1 support and managed hardware/software imaging and patching.
- Managed user accounts in Active Directory and Shoretel phone systems.

EDUCATION**Bachelors of Science in Computer Information Technology**

California State University Northridge | Northridge, CA | December 2020
